Dear Huntress Team,

I'm excited to be applying to join your team as a Senior Product Designer. While working in cybersecurity and operations management, I heard your name mentioned and learning more now I'm impressed at what you've been able to achieve. I know I'd be a wonderful asset to help you bring security to the 99%.

With 15 years of experience in user experience and design for software I've worked end-to-end conducting and interpreting research, planning features and user journeys, prototyping, and building design systems. My super power is working through ambiguity to create something cohesive and clear.

Working at Tanium I saw the benefits of using a human-centered approach and building with empathy even in a field typically more focused on tools and data than the people behind the keyboards and screens. Especially in scenarios like a hack where everyone is feeling at their worst a strong, easy to understand user experience is invaluable and often crucial.

I feel driven now to take my next step and join an organization where I can be part of a strong team; learning and growing myself while pushing and teaching my teammates through collaboration and mentorship.

Please take a minute to see some of my work at <https://fiveoclockfriday.com/level-up-your-defense> .

I look forward to speaking with you soon and learning more about becoming a part of Huntress.

Sincerely,

*Eric Browning*
