Dear Coterie Team,

I'm excited to be applying to join your team as Director of Design and User Experience. I've been learning more about Coterie and am impressed at what you've been able to achieve. I would be a strong asset to help you make insurance one of the easiest things a business ever has to purchase.

With 15 years of experience in user experience, design, and strategy for software I've worked end-to-end conducting and interpreting research, planning features and user journeys, prototyping, and building design systems. My super power is working through ambiguity to create something cohesive and clear.

Working at Tanium I saw the benefits of using a human-centered approach and building with empathy even in a field typically more focused on tools and data than the people behind the keyboards and screens. That has been true throughout other contexts in my career as well and I love the similar principles Coterie brings into the small business insurance space; putting relationships at the forefront of whatever you do.

Please take a moment to see some of my work at <https://fiveoclockfriday.com/mission-to-empower>.

Thank you, I look forward to speaking with you soon and learning about becoming a part of Coterie.

Sincerely,

*Eric Browning*
