Dear BigPanda team,

I'm excited to be applying to join your team as Senior Product Designer. I've been working in the IT operations and management space for several years now and researching BigPanda I'm impressed at what you've been able to achieve and what your goals are. I would be a strong addition to your team to help you empower teams that keep the digital world running.

With 15 years of experience in user experience, design, and leadership for software I've worked across the design process conducting and interpreting research, planning features and user journeys, prototyping, and building design systems. I thrive pushing through ambiguity to create something cohesive and clear.

Working at Tanium I saw the benefits of using a human-centered approach and building with empathy even in a field typically more focused on tools and hard data than the people behind the screens. That has been true throughout other contexts in my career as well and I love the similar principles BigPanda focuses on like leading with HEART and delivering extraordinary customer experiences.

You can see some of my work at fiveoclockfriday.com/embarrassment-of-pandas.

Thank you, I look forward to speaking with you soon.

Sincerely,

Eric Browning
